company information

founder

Elzbieta (Ela) Drzazga

- first woman in Poland to receive a Western Standard MBA
- professional esthetician
- created concept of OrganicSeries skincare line, now in over 4000 spas in Europe
- engaged a multi-disciplinary team of scientist/doctors/professionals

principles

- integrity: safe ingredients, professional results, reasonable price
- cutting-edge technology
- scientifically formulated not to cause inflammation and irritation to the skin
- compact & full professional range
- eco-organic
- social engagement

driven by innovation

convergence of advanced science with organic ingredients

simply intelligent!

elaspa is deeply committed to bringing a uniquely formulated, active synergy of highly concentrated organic plant extracts, sourced from the most pristine, sustainable eco-systems around the world.

Innovative and superbly effective blends of highly concentrated organic and natural ingredients:

- 100% natural
- 98% certified organic ingredients
- 95% active ingredients
- No parabens, synthetic colorants & perfume, mineral oils, paraffins, pegs, radiated ingredients, GMO, synthetic silicon oils, skin-irritating minerals, materials derived from animals, nano-particles

elaspa Technology - Biomimetic

The fastest growing trend in Europe in the natural cosmetic segment Biomimetic cosmetics contain natural and or organic ingredients which are identical to the components and functions of our skin or perfectly compatible with it.

The ingredients used in biomimetic cosmetics have a specific molecule size to ensure compatibility, quick absorption by the skin and work only where the skin needs it.

Example of elaspas biomimetic function and ingredients:

- DMS technology
- Hyaluronic Acid with high and low molecule weight scientifically driven – clinically proven

elaspa products have been developed over two decades by a multi-disciplinary team of researchers, dermatologists and spa therapists. We utilize innovative, patented technologies to create blends of highly effective botanical extracts drawn from over 100 carefully selected, potent natural active ingredients.

airless system

- our complete line of face and body cosmetics has been designed to deliver the highest visible results without harsh preservatives.
- our advanced packaging utilizes biodegradable materials. The airless system ensures that oxygenation is prevented, thereby extending the shelf life and eliminating the need for harmful preservatives.
- our bottles allow you to measure the exact amount of product every time: one pump always equals 1 ml and you are able to use the contents of each bottle to the very last drop.

patented design
prevents oxidation - 2 years life shelf
no waste
hygienic & exact
recyclable & biodegradable

ingredient sources

- 100% natural, certified organic, sourced from certified organic suppliers, utilizing renewable resources from France, Switzerland, Italy, Japan and other countries.
- sourced from organic producers, most who are members of The Cosmetic Valley, who have the highest standards for eco-clean, low-energy manufacturing procedures and eco-responsible sourcing.

producers are in compliance with:

GMP for cosmetic ingredients
EFCI (European Federation for Cosmetic Ingredients)
Good Agricultural and Collection Practices (GACP)
Good Manufacturing Practices (EU GMP)
European Medicines Agency (EMA)
ISO 14001 and ISO 22716 certifications

plant sourcing norms:

- high content in active principles
- precise harvesting - only parts of the plant with the richest content are harvested (less solvents, less energy-consumption; guaranteeing a stable quality).
- preservation of biodiversity

eco-clean, low-energy manufacturing procedures

- eco-designing: helps offer entirely eco-responsible, world-exclusive extracts. The solvents used are recycled; the plant residues obtained are biodegradable and composted before being returned to the fields.
- low energy manufacturing processes: fully preserving the integrity of the actives, and guaranteeing top-quality extracts.

extracting process

- plants are macerated in a natural solvent: water, or a blend of water and plant-origin ethanol
- concentration phase: under vacuum evaporation, eliminates the solvents (ethanol is recycled)
- microbiological decontamination is made by flash-pasteurization (low-energy procedure preserving the integrity of the actives)
- extracts are then dried: dehydration is carried out under vacuum by absorption of water on zeolites, (a very porous clay). The reaction is exothermic and the heat released is captured to heat the drying container. The low temperature (<45°C) preserves the structure of the plant active molecules. Native extracts are obtained (with no carrier).

optimal facial cleanser

REVITALIZING | HYDRATING | SOOTHING

KEY ACTIVES	<p>Hydriol PGCL - derived from grape seed oil; rich in minerals, gallic acid and flavonoid soften the skin</p> <p>Phytofoam™ - extracts of Shikakai tree and Gypsophila plant (baby's breath); natural soap properties</p> <p>Althaea Officinalis Root Extract - marshmallow root; has a softening and anti-inflammatory effect, also helps to inhibit degradation of hyaluronic acid</p> <p>Prunus Armeniaca (Apricot) Fruit Extract - vitamins A,B,C and E; revitalizes the skin improving its color and tone</p> <p>Malva Sylvestris (Mallow) Flower Extract – increases skin elasticity</p>
FUNCTION	<p>Soothing, anti-inflammatory, moisturizing and revitalizing</p> <p>Can be used as a mask (professionally - under a steamer) to soften and open pores preparing the skin for absorption of active ingredients</p> <p>Natural ability to remove even water proof eye make-up and mascara and prepare the skin for further treatments; safe to use on false eyelashes</p>
OTHER INGREDIENTS	<p>Aqua- Spring Water</p> <p>Lavendula Angustifolia (Lavender) Water - antiseptic, astringent and antioxidant helps to regulate sebum production and protect from UV damage</p> <p>Rosmarinus Officinalis (Rosemary) Leaf Water - antibacterial, anti-inflammatory and antiseptic helps to regenerate skin</p> <p>Rosa Damascena Flower Water – has toning properties; nourishes, brightens and rehydrates the skin</p> <p>Polyglyceryl-4 Caprate - naturally occurring alcohol from vegetable oil for emulsifying</p> <p>Glycerin - derived naturally from fermentation of sugars is skin replenishing and restoring</p> <p>Maltooligosyl Glucoside / Hydrogenated Starch Hydrolysate MG60 - corn syrup improves skin firmness and elasticity</p> <p>Sodium Polyacrylate Starch - based on natural ingredients, it leaves the skin velvety smooth</p> <p>Acacia Concinna Fruit Extract - from the acacia tree: has soothing properties</p> <p>Balanites Aegyptiaca Fruit Extract - desert date: helps in reduction of scarring, is anti-inflammatory and protects from UV damage</p> <p>Gypsophila Paniculata Root Extract - from gypsum growing in the Mediterranean basin: used for its natural soap properties</p> <p>Dehydroacetic Acid - derived naturally from fermentation of sugars and is skin replenishing and restoring</p> <p>Benzyl Alcohol - naturally derived from Jasmine, Hyacinth, and ylang-ylang for its preserving properties</p> <p>Panthenol - provitamin B5: is anti-inflammatory and moisturizing with its natural ability to penetrate the skin</p> <p>Sodium Phytate - plant based from corn, this enables formation of bubbles to enhance the cleaning effect</p>

SKIN TYPE: ALL

SKIN CONDITIONS: ALL

HEMOCARE/PROF 200ML / 6.8OZ

APPLICATION - AM/PM Wet your hands first, apply 1 pump and massage gently in a circular motion on face and neck, rinse with warm water. Follow with toner.

enzymatic toner

SOFTENING | EXFOLIATING | HYDRATING

KEY ACTIVES	Allantoin - naturally derived from comfrey: it softens, soothes and protects and is anti-inflammatory and astringent Maltooligosyl Glucoside / Hydrogenated Starch Hydrolysate - MG60 corn syrup: improves skin firmness and elasticity Citrus Paradisi Fruit Extract - high in vitamin C it relieves inflammation and accelerates healing within the skin Pineapple Sativus (Pineapple) Fruit Extract - naturally extracted bromelain: dissolves and helps remove dead skin cells Hibiscus Sabdariffa Flower Extract - rich in flavonoids and AHA it smoothens and evens tone as well as inhibit activity of elastase
FUNCTION	Refreshing, softening, anti-bacterial, increases absorption of active ingredients and balances pH levels
ESTHETIC DEVICES	Cavitation peeling
OTHER INGREDIENTS	Aqua - Spring Water Lavendula Angustifolia (Lavender) Water - antiseptic, astringent and antioxidant it helps to regulate sebum production and protect from UV damage Rosmarinus Officinalis (Rosemary) Leaf Water - antibacterial, anti-inflammatory and antiseptic it helps to regenerate cells Glycerin - derived naturally from fermentation of sugars and is skin replenishing and restoring Rosa Damascena Flower Water – has toning properties, and is nourishing and brightening Glycerin - skin replenishing and restoring derived naturally from fermentation of sugars Natural Betaine - A natural amino acid, a derivative of glycine that is highly valued because of the unique ability to attach water, and the properties that protect cell membranes. Gives a unique feeling of silkiness Benzyl Alcohol - naturally derived from Jasmine, Hyacinth, and ylang-ylang: for its preserving properties Dehydroacetic Acid - derived naturally from fermentation of sugars: is skin replenishing and restoring Allantoin - naturally derived from comfrey: it softens soothes and protects and is both anti-inflammatory and astringent Sodium Phytate - plant based from corn: it enables the formation of bubbles to enhance the cleaning effect

SKIN TYPE: dry, normal, normal-dry

SKIN CONDITIONS: sensitive,

dehydrated, mature

HOME CARE/PROF 200ML / 6.8OZ

APPLICATION - Homecare: 1-2 pumps on cotton rounds, 1 pump if applied with hands.

Professional: 2-4 pumps on cotton rounds after cleansing and exfoliating.

oil-control toner

SMOOTHING | CLARIFYING | OIL-CONTROL

KEY ACTIVES	Hamamelis Virginiana (Witch Hazel) Water - flavonoids act to seal and strengthen blood vessels Cedrus Atlantica Bark Extract – known for its antiseptic abilities and is astringent stimulates circulation and lymph system Mentha Piperita (Peppermint) Leaf Extract - relaxes tired skin, brightens and moisturizes Phytofoam™ - extracts of Shikakai tree and Gypsophila plant (baby's breath); has natural soap properties
FUNCTION	Antibacterial, eliminates dead skin cells, prepares the skin to absorb active ingredients, balances pH Restores the Natural PH of the skin
ESTHETIC DEVICES	Cavitation peeling
OTHER INGREDIENTS	Aqua - Spring Water Lavendula Angustifolia (Lavender) Water - antiseptic, astringent and antioxidant helps to regulate sebum production and protect from UV damage Rosmarinus Officinalis (Rosemary) Leaf Water - antibacterial, anti-inflammatory, and antiseptic help to regenerate Rosa Damascena Flower Water – has toning properties, nourishes, brightens, and rehydrates the skin Glycerin - skin replenishing and restoring derived naturally from fermentation of sugars Natural Betaine - A natural amino acid, a derivative of glycine that is highly valued because of the unique ability to attach water, and the properties that protect cell membranes. Gives a unique feeling of silkiness Benzyl Alcohol - naturally derived from Jasmine, Hyacinth, and ylang-ylang, for its preserving properties Acacia Concinna Fruit Extract - linoleic acid: has a strong regenerating effect Balanites Aegyptiaca Fruit Extract - has beneficial antibacterial properties Gypsophila Paniculata Root Extract - baby's breath: conditions the skin Dehydroacetic Acid - derived naturally from fermentation of sugars: is skin replenishing and restoring Sodium Phytate - plant based from corn, enables the formation of bubbles to enhance the cleaning effect Panthenol alcohol form derived from Vitamin B Sodium Hydroxide - high in alkaline to help balance the PH of the skin

SKIN TYPE: oily

SKIN CONDITIONS: acne-prone

HOME CARE/PROF 200ML / 6.8OZ

APPLICATION - Homecare: 1-2 pumps on cotton rounds, 1 pump if applied with hands.

Professional: 2-4 pumps on cotton rounds after cleansing and exfoliating.

exfoliating

gentle bamboo exfoliator

CLEANSING | SMOTHING | INVIGORATING

KEY ACTIVES	Bamboo Arundinacea Powder - round micro spheres: mechanical exfoliator that promotes cellular turnover Butyrospermum Parkii (Shea Butter) - Vitamin E: anti-oxidant, moisturizing and healing Rose Hydrosol - soothing, calming, softening, desensitizing and keeps moisture balance
FUNCTION	Manual exfoliation – removal of dry, dead skin cells
OTHER INGREDIENTS	Aqua - Spring Water Rosa Damascena Flower Water – has toning properties, nourishes, brightens, and rehydrates the skin Decyl Cocoate - naturally derived from coconut oil for its emollient properties Triglyceride - naturally derived from coconut, for its skin replenishing abilities Glycerol Stearate Citrate - from Glycerin, for soft smooth appearance Cetearyl Alcohol - naturally derived for enhancing texture Glycerin - skin replenishing and restoring derived naturally from fermentation of sugars Distarch Phosphate - a water soluble polysaccharide that provides moisture control Benzyl Alcohol - naturally derived from Jasmine, Hyacinth, and ylang-ylang, for its preserving properties Glycerol Caprylate - naturally derived from coconut, for its skin replenishing abilities Dehydroacetic Acid - derived naturally from fermentation of sugars and is skin replenishing and restoring Xanthan Gum - naturally derived for its ability to hold water and condition the skin Parfum - a combination of essential oils in the fragrance Tocopherol - (mixed) Vitamin E: an acetate known for its antioxidant properties Beta-Sitosterol - moisturizing and soothing is a fatty acid derived from plants Squalene - oil derived from olive: used for its emollient and antioxidant properties Linalool - fragrance naturally derived from lavender D-Limonene - natural fragrance derived from citrus and pine with antioxidant benefits

SKIN TYPE: ALL

SKIN CONDITIONS: ALL

HOME CARE 50ML / 1.7OZ PROF 200ML / 6.8OZ

APPLICATION - Homecare: 1x a week/PM; dampen hands, apply 1 pump and massage gently in a circular motion on face and neck for 2-3 mins then rinse with warm water. Follow with toner.

anti-aging serum intensive

REGENERATING | FIRMING | REVITALIZING

KEY ACTIVES	<p>Iris Florentina Root Extract has a strong anti-aging effect isoflavones stimulate the renewal of the epidermis</p> <p>Eleutherooccus Senticosus Root Extract strong anti-wrinkle and anti-aging properties through oxygenation of the skin cells</p> <p>Vitis Vinifera (Grape) Leaf Extract high in antioxidants and ascorbic acid for its anti-aging benefits</p> <p>Trehalose protects cells against water loss, strong moisturizing properties that protect from free radicals</p> <p>Hyaluronic Acid 2 in 1 - helps to retain over a 1000 times its weight in water within the cells of skin</p>
FUNCTION	<p>Antioxidant, anti-aging; stimulates cellular renewal, enhances firmness and elasticity</p> <p>Stimulates the active layer of cells in the lower epidermis, regulates moisture</p>
ESTHETIC DEVICES	<p>See Page 9 for all devices (use up to 8ml/pumps with devices)</p>
OTHER INGREDIENTS	<p>Aqua Spring Water</p> <p>Lavendula Angustifolia (Lavender) Water antiseptic, astringent and antioxidant helps to regulate sebum production and protect from UV damage</p> <p>Rosmarinus Officinalis (Rosemary) Leaf Water antibacterial, anti-inflammatory and antiseptic help to regenerate</p> <p>Rosa Damascena Flower Water toning properties, nourish and brighten the skin and rehydrate</p> <p>Glycerin skin replenishing and restoring derived naturally from fermentation of sugars</p> <p>Sodium Acrylate Starch a polymer of sodium used as a gelling agent</p> <p>Benzyl Alcohol naturally derived from Jasmine, Hyacinth, and ylang-ylang, for its preserving properties</p> <p>Dehydroacetic Acid skin replenishing and restoring de-rived naturally from fermentation of sugars</p> <p>Sodium Hyaluronate Sodium Hyaluronate one of the main components hyaluronic acid for its ability to hold water</p> <p>Sodium Phytate all-natural stabilizer, chelating agent</p>

Independent lab test results in 3 weeks:

- + 25.65% moisture
- 12.30% erythema
- 8.31% TEWL
- + 20.43 elasticity

SKIN TYPE: mature (40+, pre/postmenopausal),
 SKIN CONDITIONS: wrinkles, lack of firmness, tired, dehydrated skin
 HOMECARE 50ML / 1.7OZ PROF 200ML / 6.8OZ

APPLICATION - Homecare: AM/PM use 1 pump on face/neck after cleansing & toning, follow with cream.
 Professional: to treat only one skin condition use: 3 ml/pumps

anti-redness serum

ANTI-REDNESS | ANTI-AGING | CALMING

KEY ACTIVES	Ginkgo Biloba Leaf Extract - improves blood circulation, strengthens blood vessels and is a strong antioxidant Ilex Paraguariensis Leaf Extract - naturally from the holly family and has anti-inflammatory abilities Vitis Vinifera (Grape) Leaf Extract - high in antioxidants and ascorbic acid used for its anti-aging benefits Witch Hazel Hydrosol - anti-inflammatory, soothing, strengthens walls of capillaries Hyaluronic Acid 2 in 1 - helps to retain over a 1000 times its weight in water within the cells of skin Natural Betaine - a natural amino acid, a derivative of glycine that is highly valued because of the unique ability to attach water and the properties that protect cell membranes, it gives a unique feeling of silkiness
FUNCTION	Prevents cell oxidation, increases blood circulation, and increases elasticity and moisture Improves skin's tone and helps to minimize the appearance of wrinkles.
ESTHETIC DEVICES	See Page 9 for all devices (use up to 8ml/pumps with devices)
OTHER INGREDIENTS	Aqua - Spring Water Lavendula Angustifolia (Lavender) Water - antiseptic, astringent and antioxidant helps to regulate sebum production and protect from UV damage Rosmarinus Officinalis (Rosemary) Leaf Water - antibacterial, anti-inflammatory and antiseptic Rosa Damascena Flower Water – has toning properties, nourishes, brightens, and rehydrates the skin Hamamelis Virginiana (Witch Hazel) Water - flavonoids act to seal and strengthen blood vessels Glycerin - skin replenishing and restoring derived naturally from fermentation of sugars Dehydroacetic Acid - derived naturally from fermentation of sugars: is skin replenishing and restoring Benzyl Alcohol - naturally derived from Jasmine, Hyacinth, and ylang-ylang, for its preserving properties Sodium Polyacrylate Starch - polymer of sodium: used as a gelling ingredient Sodium Hyaluronate - one of the main components of hyaluronic acid for its ability to hold water Sodium Phytate – all-natural stabilizer, chelating agent.

Independent lab test results in 3 weeks:
- 54.80% sensitivity reduced

SKIN TYPE: ALL
SKIN CONDITIONS: sensitive, couperose, rosacea, defused redness
RETAIL 50ML / 1.7OZ PROF 200ML / 6.8OZ

APPLICATION - Homecare: AM/PM use 1 pump on face/neck after cleansing & toning, follow with cream.
Professional: to treat only one skin condition use: 3 ml/pumps

brightening serum intensive

SUN DAMAGE | HYPERPIGMENTATION | UNEVEN SKIN TONE

KEY ACTIVES	<p>Gigawhite Alpine Plant Complex: Malva Sylvestris (Mallow) Extract, Alchemilla Vulgaris Extract, Melissa Officinalis Leaf Extract, Mentha Piperita (Peppermint) Leaf Extract, Veronica Officinalis Extract, Achillea Millefolium Extract, Primula Veris Extract- suppress melanin production, skin lightening system Hyaluronic Acid 2 in 1 - helps to retain over a 1000 times its weight in water within the cells of skin Natural Betaine - a natural amino acid, a derivative of glycine that is highly valued because of the unique ability to attach water and the properties that protect cell membranes, it gives a unique feeling of silkiness</p>
FUNCTION	Lightening of hyper-pigmentation, improves skin tone, hydrates, brightens
ESTHETIC DEVICES	See Page 9 for all devices (use up to 8ml/pumps with devices)
OTHER INGREDIENTS	<p>Aqua (spring water), (Lavendula Angustifolia (Lavender) Water - antiseptic, astringent and antioxidant helps to regulate sebum production and protect from UV damage Rosmarinus Officinalis (Rosemary) Leaf Water - antibacterial, anti-inflammatory and antiseptic Rosa Damascena Flower Water – has toning properties, nourishes, brightens, and rehydrates the skin Glycerin - skin replenishing and restoring derived naturally from fermentation of sugars Dehydroacetic Acid - derived naturally from fermentation of sugars: is skin replenishing and restoring Benzyl Alcohol - naturally derived from Jasmine, Hyacinth, and ylang-ylang, for its preserving properties Sodium Polyacrylate Starch - polymer of sodium: used as a gelling ingredient Sodium Hyaluronate - one of the main components of hyaluronic acid for its ability to hold water Sodium Phytate – all-natural stabilizer, chelating agent</p>

Independent lab test results in 4 weeks:
-22.96% melanin content

SKIN TYPE: ALL
 SKIN CONDITIONS: uneven skin tone, sun damage, hyperpigmentation
 RETAIL 50ML / 1.7OZ PROF 200ML / 6.8OZ

APPLICATION - Homecare: AM/PM use 1 pump on face/neck after cleansing & toning, follow with brightening cream forte.
 Professional: to treat only one skin condition use: 3 ml/pumps

eye serum intensive

BRIGHTENING | MOISTURIZING | ANTI-AGING

KEY ACTIVES	<p>Castanea Sativa (Chestnut) Extract - escin, saponin, and coumarins seal capillary walls and is anti-inflammatory</p> <p>Avena Sativa (Oat) Kernel Extract - antioxidants promote regeneration and soothe irritations</p> <p>Triticum Vulgare Germ Extract - soothes and protects against the formation of wrinkles and deeply moisturizes</p> <p>EyePro 3x - yeast extract: along with betaine from sugar beets smooths wrinkles, dark circles and edema</p> <p>Hyaluronic Acid 2 in 1 - helps to retain over a 1000 times its weight in water within the cells of skin</p> <p>Natural Betaine - a natural amino acid, a derivative of glycine that is highly valued because of the unique ability to attach water, and the properties that protect cell membranes. Gives a unique feeling of silkiness</p>
FUNCTION	<p>Reduces puffiness, sagging, lightens dark circles by thickening skin and strengthening fragile capillaries</p> <p>Enhances healing and strengthens natural immunity, moisturizes and protects</p>
ESTHETIC DEVICES	<p>See Page 9 for all devices (use up to 8ml/pumps with devices)</p>
OTHER INGREDIENTS	<p>Aqua - Spring Water</p> <p>Lavendula Angustifolia (Lavender) Water - anti-septic, astringent and antioxidant helps to regulate sebum production and protect from UV damage</p> <p>Rosmarinus Officinalis (Rosemary) Leaf Water - antibacterial, anti-inflammatory and antiseptic help to regenerate</p> <p>Rosa Damascena Flower Water – has toning properties, nourishes, brightens, and rehydrates the skin</p> <p>Centaurea Cyanus Flower Water - derived from cornflower for its anti-inflammatory properties</p> <p>Glycerin - skin replenishing and restoring de-rived naturally from fermentation of sugars</p> <p>Sodium Acrylate Starch - polymer of sodium used as a gelling agent</p> <p>Benzyl Alcohol - naturally derived from Jasmine, Hyacinth, and ylang-ylang, for its pre-serving properties</p> <p>Pentylene Glycol - for its skin replenishing abilities</p> <p>Saccharomyces Cerevisiae Extract - derived from yeast: for its skin conditioning</p> <p>Rhodiola Rosea Root Extract - antioxidant and flavonoid rich helps improve fine lines and wrinkles</p> <p>Sodium Hyaluronate - one of the main components hyaluronic acid for its ability to hold water</p> <p>Dehydroacetic Acid - derived naturally from fermentation of sugars and is skin replenishing and restoring</p> <p>Sodium Phytate – all-natural stabilizer</p>

SKIN TYPE: ALL
 SKIN CONDITIONS: mature, dehydrated, lines & wrinkles,
 lack of elasticity, puffiness, dark circles
 RETAIL 50ML / 1.7OZ PROF 200ML / 6.8OZ

APPLICATION - Homecare: AM/PM use 0.5/1 pump around eye contour after cleansing & toning, follow with eye cream.
 Professional: 1 ml with manual application, and up to 2/3 ml with the use of esthetic devices.

hyaluronic acid 2 in 1

EXTRA HYDRATING | FILLING | REGENERATING

KEY ACTIVES	<ul style="list-style-type: none"> • High molecular weight hyaluronic acid (1,500 kDA) • Low molecular weight hyaluronic acid (80 kDA) • Concentration 2.5%
FUNCTION	<ul style="list-style-type: none"> • High molecular weight: powerful skin surface moisturizing, anti-aging, regenerates, creates a protective film on the outer layer of the skin • Low molecular weight: assists in rebuilding the skin matrix, reduces fine lines and wrinkles, addresses moisture content in the deeper layers of the skin
APPLICATION	<ul style="list-style-type: none"> • Compatible with all major aesthetic devices in medi-spas • Manual facials • Homecare use • Due to its concentration and kDA sizes can be used daily without causing skin irritation
ALL INGREDIENTS	<ul style="list-style-type: none"> • Aqua - Spring Water • Sodium hyaluronate - one of the main component's hyaluronic acid for its ability to hold water • Benzyl Alcohol - naturally derived from Jasmine, Hyacinth and ylang-ylang for its preserving properties • Dehydroacetic Acid derived naturally from fermentation of sugars - skin replenishing and restoring

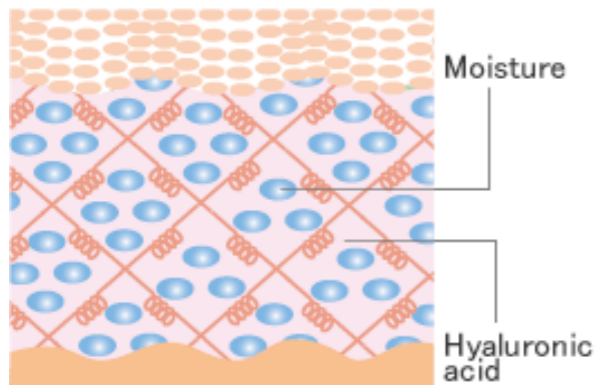

SKIN TYPE: ALL

SKIN CONDITIONS: ALL

RETAIL 50ML / 1.7OZ PROF 200ML / 6.8OZ

APPLICATION - Homecare: AM/PM use 1 pump on face/neck after cleansing & toning, follow with cream. Can be used as an eye serum.

Professional: to treat only one skin condition use: 3 ml/pumps

- Hyaluronic Acid is a glycosaminoglycan, a molecule composed partly of sugars. This powerful moisture-binding ingredient helps keeps skin plump and hydrated.
- Touted for its ability to reverse or stop aging, Hyaluronic Acid is known as the “Key to the fountain of youth”.
- Hyaluronic acid plays a critical role in skin health with its unique ability to hold in moisture (1000 ml of water per gram of hyaluronic acid).
- Hyaluronic Acid binds water within the cells of the skin and releases it slowly maintaining a “plump” and youthful appearance. Its unmatched hydrating ability rejuvenates the skin resulting in an increased smoothness, firmness, elasticity, and a decreased appearance of wrinkles.

oil-control serum

MATIFYING | BALANCING | CALMING

KEY ACTIVES	<p>Jasminum Officinale Extract - treats dehydrated skin and skin tone as well as enhancing collagen production</p> <p>Enantia Chlorantha Bark Extract – plant based extract that assists in regulation of the sebaceous glands as well as inhibiting inflammation</p> <p>Citrus Nobilis (Mandarin) Orange) Fruit Extract - anti-inflammatory and antiseptic</p> <p>Evermat™ - Enantia Chlorantha</p> <p>Hyaluronic Acid 2 in 1 - helps to retain over a 1000 times its weight in water within the cells of skin</p> <p>Oleanolic Acid - reduces/ normalizes sebum production, thus improving the appearance of oily skin</p> <p>Natural Betaine - a natural amino acid, a derivative of glycine that is highly valued because of the unique ability to attach water, and the properties that protect cell membranes. Gives a unique feeling of silkiness</p>
FUNCTION	<p>Purifying, antibacterial, anti-aging, and rejuvenating</p> <p>Diminishes irritations and heals blemishes and scars</p> <p>Refines pore size, reduces shine, and improves overall tone</p>
ESTHETIC DEVICES	See Page 9 for all devices (use up to 8ml/pumps with devices)
OTHER INGREDIENTS	<p>Aqua - Spring Water</p> <p>Lavendula Angustifolia (Lavender) Water - antiseptic, astringent and antioxidant; helps to regulate sebum production and protect from UV damage</p> <p>Rosmarinus Officinalis (Rosemary) Leaf Water - antibacterial, anti-inflammatory and antiseptic help to regenerate</p> <p>Rosa Damascena Flower Water – has toning properties, nourishes, brightens, and rehydrates the skin</p> <p>Glycerin - skin replenishing and restoring derived naturally from fermentation of sugars</p> <p>Sodium Acrylate Starch - a natural polymer</p> <p>Benzyl Alcohol - naturally derived from Jasmine, Hyacinth, and ylang-ylang, for its preserving properties</p> <p>Arctium Lappa Root Extract - stimulates collagen production and protects against inflammation</p> <p>Dehydroacetic Acid - an organic compound used to preserve and has mild antibacterial and anti-fungal properties</p> <p>Sodium Hyaluronate - one of the main components hyaluronic acid for its ability to hold water</p> <p>Sodium Phytate – all natural stabilizer, chelating agent</p>

SKIN TYPE: oily, normal-oily

SKIN CONDITIONS: acne, overproduction of sebum

RETAIL 50ML / 1.7OZ PROF 200ML / 6.8OZ

APPLICATION - Homecare: AM/PM use 1 pump on face/neck after cleansing & toning, follow with cream.

Professional: to treat only one skin condition use: 3 ml/pumps

oxygenating serum

OXYGENATING | ANTI-AGING | HYDRATING

KEY ACTIVES	<p>Corn Silk – mineral rich; it will nourish, soothe, and improve the skin’s elasticity</p> <p>Sea Fennel - has a toning and anti-inflammatory effect</p> <p>Gatuline - derived from beech tree buds and increases oxygen intake by 70% increasing skin hydration</p> <p>Hyaluronic Acid 2 in 1 - helps to retain over a 1000 times its weight in water within the cells of skin</p> <p>Natural Betaine - a natural amino acid, a derivative of glycine that is highly valued because of the unique ability to attach water and the properties that protect cell membranes, it gives a unique feeling of silkiness</p> <p>Sodium PCA - restores and maintains optimal hydration and limits transdermal water loss of TEWL and occurs in the skin as a component of natural moisturizing factor NMF.</p>
FUNCTION	<p>Anti-dullness, nourishing, anti-aging</p> <p>Increases luminosity and brightness</p> <p>Improves skin texture, induces skin self-healing and repairing abilities</p>
ESTHETIC DEVICES	<p>See Page 9 for all devices (use up to 8ml/pumps with devices)</p>
OTHER INGREDIENTS	<p>Aqua - Spring Water</p> <p>Lavendula Angustifolia (Lavender) Water - antiseptic, astringent and antioxidant helps to regulate sebum production and protect from UV damage</p> <p>Rosmarinus Officinalis (Rosemary) Leaf Water - antibacterial, anti-inflammatory and antiseptic</p> <p>Rosa Damascena Flower Water – has toning properties, nourishes, brightens, and rehydrates the skin</p> <p>Glycerin - skin replenishing and restoring derived naturally from fermentation of sugars</p> <p>Benzyl Alcohol - naturally derived from Jasmine, Hyacinth, and ylang-ylang, for its preserving properties</p> <p>Laminaria Digitara Extract - or extract of algae: naturally derived for its skin conditioning abilities</p> <p>Dehydroacetic Acid - an organic compound used to preserve and has mild antibacterial and anti-fungal properties</p> <p>Sodium Acrylate Starch - polymer of sodium: used as a gelling ingredient</p> <p>Sodium Hyaluronate - one of the main components hyaluronic acid for its ability to hold water</p> <p>Sodium Phytate – all-natural stabilizer, chelating agent.</p>

SKIN TYPE: ALL

SKIN CONDITIONS: asphyxiated, dull, dehydrated, nutrient deficient

RETAIL 50ML / 1.7OZ PROF 200ML / 6.8OZ

APPLICATION - Homecare: AM/PM use 1 pump on face/neck after cleansing & toning, follow with cream.

Professional: to treat only one skin condition use: 3 ml/pumps

vitamin C optimal age repair serum

BRIGHTENING | FIRMING | REJUVENATING

<p>KEY ACTIVES</p>	<p>Superox-C- it's an extract from Kakadu Plum- world's richest source of vitamin c. It stimulates vitamin c transporter expression (SVCT-1) which is vital for the transport of vitamin c into the skin's cells. It also has anti-aging properties, fights oxidative stress, improves skin radiance and boosts luminosity. In vivo tests had shown that it has rejuvenating action on the skin, helps fight redness and uneven skin tone. Kakadu Plum is also a rich source of vitamin E, phytochemicals, minerals (zinc, iron, lutein, folate) that are essential for a healthy, clear complexion.</p> <p>10% AA2G (Ascorbic acid 2-glucosidase)- It's a unique, stabilized form of vitamin c developed by binding glucose to ascorbic acid. It helps support the skin's ability to fight free radicals, resulting in younger looking, brighter skin.</p> <p>Mg-60 corn syrup- strongly moisturizes, improves skin's firmness and elasticity. Protects against irritation. It contains large amounts of saccharides for intense soothing and smoothing the skin. It helps to maintain proper hydration and makes the skin becomes less susceptible to irritation.</p> <p>Aquaxtrem- It's a moisturizing agent that works from the inside by stimulating hydration mechanisms of the skin. It improves stratum corneum resistance and cohesion, stimulates barrier function, normalizes skin desquamation and recovers skin's hydration.</p>
<p>FUNCTION</p>	<p>Serum can be used for all skin types. It helps to repair the damage done by free radicals and the sun. It will brighten the complexion and help balance uneven skin tone while providing firming and antiaging benefits.</p>
<p>OTHER INGREDIENTS</p>	<p>Aqua- spring water Ascorbyl Glucoside, Arginine- amino acid known for skin conditioning properties Glycerin- - skin replenishing and restoring derived naturally from fermentation of sugars Hydrogenated Starch Hydrolysate- corn-derived ingredient that helps to retain moisture Propanodiol- humectant, emollient and solvent Xantham Gum- naturally derived for its ability to hold water and condition the skin Lecithin- skin conditioning agent and a surfactant- emulsifying agent, antioxidant Phenoxyethanol- prevents the growth of bacteria, fungi and yeast Scroletium Gum- natural thickener, stabilizer Ethylhexyglycerin- natural preservative, surfactant, skin-conditioning agent Pullulan naturally derived from yeast improves skin's texture and appearance Sodium Phytate- all-natural chelating agent, stabilizer</p>

SKIN TYPE: ALL
 SKIN CONDITIONS: mature, sun damage, uneven skin tone

APPLICATION - Homecare: AM (follow with SPF) /PM use- 0.5 pump on the face/neck after cleansing & toning, follow with a moisturizer.

Professional: 1 ml with manual application, and up to 2/3 ml with the use of esthetic devices.

RETAIL 50ML / 1.7OZ PROF 200ML / 6.8OZ

moisturizing creams forte

DMS (Derma Membrane Structure) technology is used to create the base of all CREAM FORTES

The major functions of DMS-base:

- mimics the structure and chemical composition of the natural lipidic skin barrier in the Stratum Corneum causing immediate integration
- reduces the trans-epidermal water loss
- increases absorption of active ingredients
- protects against the penetration of foreign substances
- stimulates skin regeneration

The major components of DMS-base:

- hydrogenated PC (phosphatidylcholine - from soybean lecithin)
- oil-based substances
- water
- phytosterols (i.e.. extracted from shea butter)
- moisturizing agents (i.e.. glycerin)

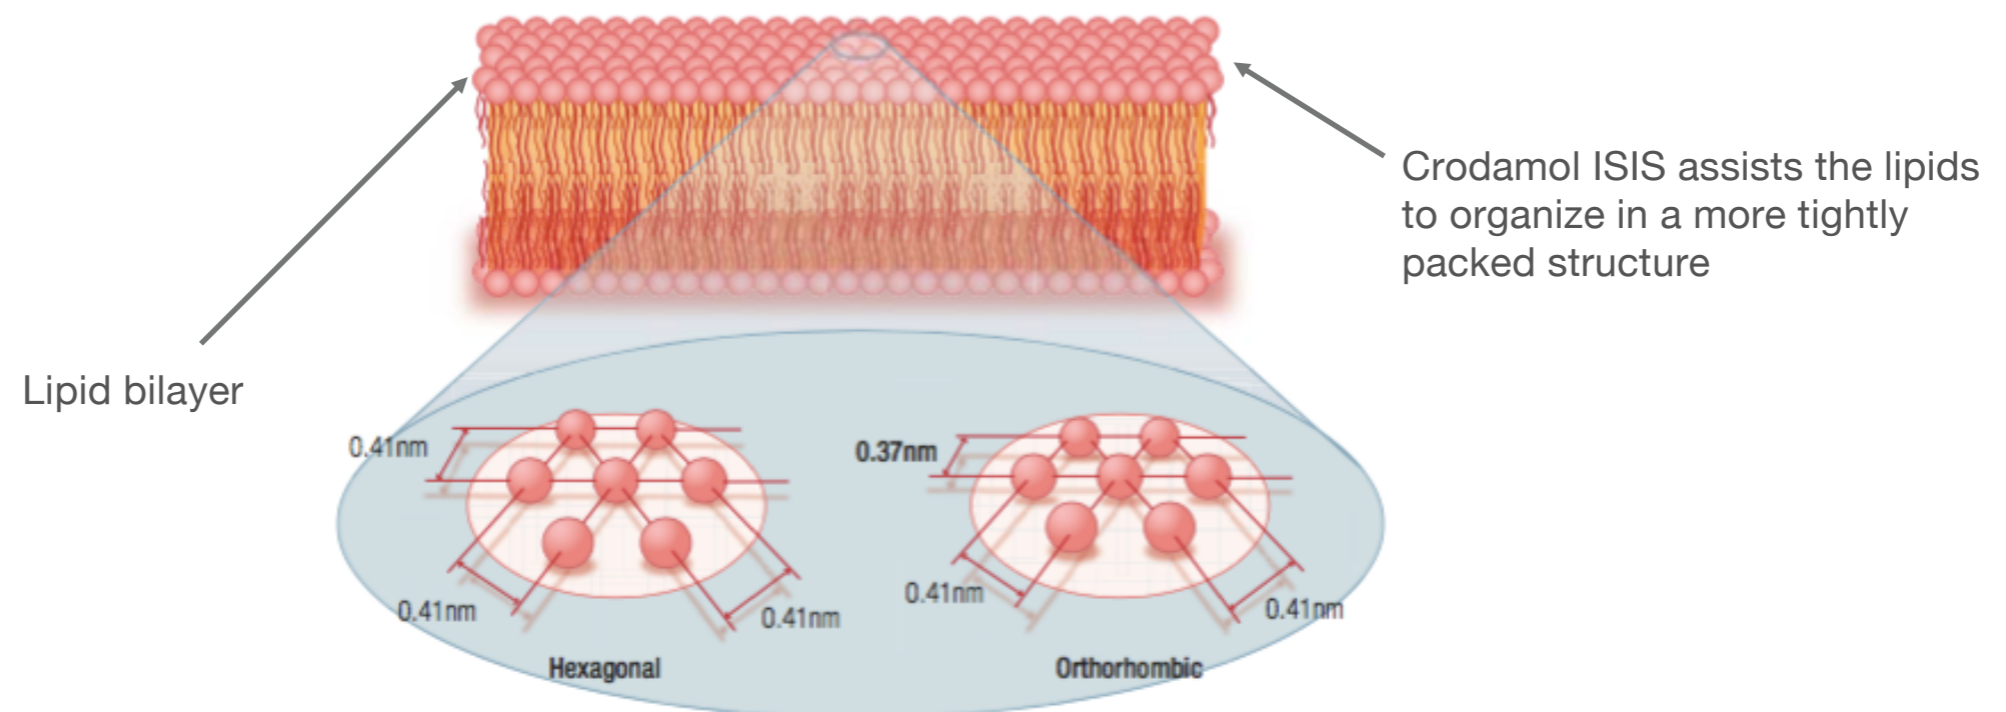

crodamol ISIS (Isostearyl Isostearate)

- 100% naturally derived with no additives
- moisturizes and protects the skin by optimizing the potential of the natural skin barrier to prevent the escape of water
- works in synergy with the lipid bilayers of the skin, stabilizing them in a more tightly packed structure, optimizing their effectiveness in preventing water loss

The stratum corneum is made up of corneocytes surrounded by lipids, providing both a mechanical and chemical barrier to the environment. The lipids in the stratum corneum arrange themselves into bilayers which form lipid lamellae orientated parallel to the skin and it's these lipids that provide much of the skin barrier's water holding function.

Within these lipid bilayers, the lipids can be organized (packed) into hexagonal or orthorhombic structures, the packing organization determines how effective the bilayer is in controlling water loss and stopping the penetration of potential irritants.

anti-aging cream forté

REGENERATING | FIRMING | REVITALIZING

COMMON BASE INGREDIENTS IN ALL FORTE CREAMS

GlycoHyal LW - hyaluronic acid and hydrolyzed glycosaminoglycans; enhances moisture penetration

Crodamol™ Isis - works in synergy with the natural skin barrier to enhance skin moisture

<p>KEY ACTIVES</p>	<p>Iris Florentina Root Extract has a strong anti-aging effect from isoflavones Eleutherococcus Senticosus Root Extract or Siberian ginseng has strong anti-wrinkle and anti-aging effects from increased circulation and cell renewal Vitis Vinifera (Grape) Leaf Extract protects the skin from premature aging, tannins stimulate microcirculation Perilla Oil - anti-inflammatory, antiseptic GlycoHyal LW - hyaluronic acid and hydrolyzed glycosaminoglycans; enhances moisture penetration Peptamide™ 6 - botox-like effect, anti-aging Crodoamol ISIS or Isosteara Isostearate ester of isopropyl alcohol used to soften the skin and prevents percutaneous water loss Tocopherol (mixed) Vitamin E acetate is known for its antioxidant properties Maltooligosyl Glucoside / Hydrogenates Starch Hydrolysate MG60 corn syrup improves skin firmness and elasticity Perilla Ocymoides Seed Oil anti-inflammatory, omega fatty acids for anti-aging and problematic skin</p>
<p>FUNCTION</p>	<p>Stimulates collagen and elastin production increasing skin tone, rejuvenating, reduces fine lines and wrinkles, minimizes signs of photoaging Unique lamellar cream structure mimics the structure of human skin and ensures penetration of active ingredients</p>
<p>OTHER INGREDIENTS</p>	<p>Aqua Spring Water Sorbitan Stearate a naturally occurring fatty acid esters used to thicken Sorbityl Laurate a naturally occurring fatty acid from sor-bitol used to emulsify Isoamyl Cocoate naturally derived from sugar beets that leaves skin feeling silky and not oily Glycerin skin replenishing and restoring derived from fermented sugars Cetearyl Alcohol naturally derived for enhancing texture Butyrospermum Parksii Butter shea butter fatty acids are nourishing and protecting, strengthens capillaries Hexapeptide-11 derived from yeast enhances collagen production stimulation Benzyl Alcohol naturally derived from Jasmine, Hyacinth, and ylang-ylang, for its preserving properties Panthenol this provitamin B5 is anti-inflammatory and moisturizing with its natural ability to penetrate the skin Hydrolyzed Glycosaminoglycans polysaccharides of glu-cosamine and glucuronic acid to increase hydration of the skin Hyaluronic Acid for its ability to collect water for proper skin hydration Dehydroacetic Acid an organic compound used to pre-serve and has mild antibacterial and anti-fungal properties Xanthan Gum naturally derived for its ability to hold water and condition the skin Tetrasodium Glutamate Diacetate Beta-Sitosterol moisturizing and soothing is a fatty acid derived from plants Squalene oil derived from olive used for its emollient and antioxidant properties Parfum a combination of essential oils in the fragrance Citronellol natural scent derived from citronella oil Geraniol naturally derived fragrance from geranium plant extracts. Citral a natural component of lemongrass oil and oils of verbena, lemon myrtal, lemon and orange and gives a fresh lemon peel scent Linalool fragrance naturally derived from lavender D-Limonene natural fragrance derived from citrus or pine with antioxidant benefits</p>

moisturizing creams

vitamin C optimal age repair cream

BRIGHTENING | REJUVENATING | MOISTURIZING

<p>KEY ACTIVES</p>	<p>Superox-C- it's an extract from Kakadu Plum (Terminalia Ferdinandiana Fruit Extract), a unique super fruit known as the world's richest source of vitamin c. Stimulates Vitamin C transporter Expression (SVCT-1) which is vital for the transport of Vitamin C into skin cells. It also has anti-aging properties, fights oxidative stress, improves skin radiance and boosts luminosity. Kakadu Plum is also a rich source of: vitamin E (another vitamin that helps to repair and heal the skin, whilst protecting against free radicals), phytochemicals (Kakadu Plum contains a phytochemical called gallic acid that fights against inflammation, and minerals (zinc, iron, lutein and folate, all of which are essential for a healthy, clear complexion).</p> <p>10% AA2G (Ascorbic Acid 2-Glucoside)- it's a unique, stabilized form of vitamin C developed by binding glucose to ascorbic acid. It helps support the skin's ability to fight free radicals.</p> <p>Joboba Oil- it's super hydrating and lighter in consistency than other face oils. It absorbs very quickly and provides long lasting hydration and as well as nourishment to the skin. It's non-acnegenic, non-allergenic, not greasy, and also has antibacterial and soothing action.</p> <p>Crambe Abyssinica Seed Oil- it has a high content of fatty acids and it's resistant to oxidation, it has anti-inflammatory, cell communicating and skin conditioning properties.</p> <p>Mg - 60 corn syrup- strongly moisturizes. Improves skin firmness and elasticity. Protects against irritation.</p>
<p>FUNCTION</p>	<p>Brightening, firming, moisturizing, rejuvenating, anti-aging and improving skin tone.</p>
<p>OTHER INGREDIENTS</p>	<p>Aqua- spring water, Isoamyl Cocoate- naturally derived from sugar beets: that leaves skin feeling silky and not oily, Arginine- amino acid known for skin conditioning properties Atearyl Alcohol-naturally derived for enhancing texture Hydrogenated Starch Hydrosalate- corn-derived ingredient that helps to retain moisture Glycerin- skin replenishing and restoring derived naturally from fermentation of sugars, Glyceryl Stearate- emulsifying and emollient from glycerin and stearic acid Jassminum Officinalis Oil- treats dry, dehydrated skin, has antiseptic and rejuvenating properties. Myristil Myristate- naturally derived ester that is an emollient and texture enhancer Rheum Rhaponticum Root Extract- regulates skin desquamation, restores skin's moisturization and prevents moisture loss, Sweet Almond Oil (prunis Amygdalus Dulcis)- fights free radicals, helps retain moisture, makes skin look smooth Sunflower Seed Oil (Helianthus Annuus) Hydrogenated Vegetable Oil - rich in vitamin E and fatty acids, fights inflammation, enhances new cells development Phenoxyethanol, Sodium Phytate- stabilizing agent Parfum- a combination of essential oils in the fragrance Benzyl Salicylate, Tocopherol- vitamin E is known for its antioxidant and soothing properties and stimulates tissue regeneration Ethylhexylglycerin- natural preservative, keep product from separating and softens skin Citral- a natural component of lemongrass oil and oils of verbena, lemon myrtal, lemon and orange and gives a fresh lemon peel scent Limonene-natural fragrance ingredient from citrus oils, Lonalool- fragrance naturally derived from jasmine.</p>

APPLICATION - Homecare:
 AM (follow with SPF)/ PM – use ½-1 pump on face & neck after cleanser, and serum.
Professional: Apply on face, neck, and décolleté.

SKIN TYPE: all,
SKIN CONDITIONS:
 aging, uneven complexion, lines and wrinkles
RETAIL 50ML / 1.7OZ

soothing treatment

CALMING | REGENERATING | MOISTURIZING

KEY ACTIVES	<p>Tripleurospermum Maritima Extract - sea mayweed/sea chamomile; used for its soothing and calming effects</p> <p>MG-60 Corn Syrup - calming, healing, soothing</p> <p>Red Algae Extract - natural UVA filter, balances minerals in the skin, smoothing, minimizes lines</p> <p>Aloe Barbadosis (Aloe Vera) Leaf Juice - saccharides with intensive soothing and smoothing effect help with hydration and regeneration and nourishing</p> <p>Maltooligosyl Glucoside / Hydrogenated Starch Hydrolysate - MG60 corn syrup: improves skin firmness and elasticity</p>
FUNCTION	<p>Calming, anti-free radical, strengthens and enhances skin's suppleness</p> <p>Vitamin C helps fight free radicals and is regenerating</p> <p>Niacin (Vitamin B) strengthens skin and blood vessels</p> <p>Soothing, toning and comforting</p>
ESTHETIC DEVICES	<p>After any therapy which may be aggravating to the skin</p>
OTHER INGREDIENTS	<p>Aqua - Spring Water</p> <p>Lavendula Angustifolia (Lavender) Water - antiseptic, astringent and antioxidant helps to regulate sebum production and protect from UV damage</p> <p>Rosmarinus Officinalis (Rosemary) Leaf Water - antibacterial, anti-inflammatory and antiseptic help to regenerate the skin</p> <p>Rosa Damascena Flower Water - toning properties, nourish and brighten the skin and rehydrate</p> <p>Glycerin - skin replenishing and restoring derived naturally from fermentation of sugars</p> <p>Benzyl Alcohol - naturally derived from Jasmine, Hyacinth, and ylang-ylang, for its preserving properties</p> <p>Chondrus Crispus (Carrageenan) Extract - vegetable silicone from red algae: long-lasting moisturizing, smooths and prevents water loss</p> <p>Sodium Acrylate Starch - a natural polymer</p> <p>Dehydroacetic Acid - derived naturally from fermentation of sugars and is skin replenishing and restoring</p> <p>Sodium Hyaluronate - one of the main components hyaluronic acid for its ability to hold water</p> <p>Sodium Phytate - plant based from corn: this enables formation of bubbles to enhance the cleaning effect</p>

SKIN TYPE: ALL

SKIN CONDITIONS: irritated, sensitive, sun burn, post-waxing, post-peel, post-laser treatment, after shaving

APPLICATION - Homeware & Professional: Apply onto face, neck and décolleté for 20 minutes. Remove with warm water.

protocols and customization

Elaspa is a full range of professional products that are formulated to address all major skin concerns with a specific protocol for each skin condition. Each phase of elaspa treatment delivers a specific benefit to the skin, however, it is when the five-step protocol is followed, in proper sequence, that optimal results are achieved.

Elaspa products are synergistic and therefore, can be mixed with each other or substituted to enhance the results and to address more than one skin concern in one treatment. The examples of how to customize the treatments are provided with each elaspa facial protocol.
